SUPA SHIELD 'HOOK-CLAMP' SECURITY

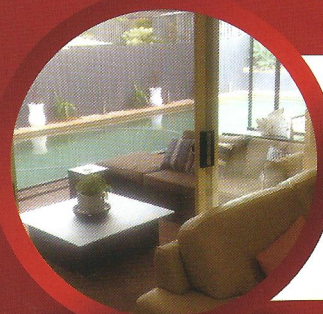

We don't use a screw, glue, or PVC wedge system. Instead, we innovatively 'hook' the mesh inside the frame. This makes it near impossible to pull out as it would have to be entirely unfolded (in other words, taken apart, in order to enter unlawfully). This is different to a screw method, for example, as our sizes have to be exact otherwise the "hook" simply won't fit, whereas driving a screw through the mesh (puncturing its structural integrity and potentially risking corrosion) could possibly only hold the door together by a few strands.

SUPA SHIELD CAN BE USED ON DOORS, WINDOWS, SCREENED ENCLOSURES, AND BI-FOLDS

SUPA SHIELD COMES WITH A LINING OF RUBBER INSULATION TO PRO - ACTIVELY PREVENT CORROSION.

WE ARE THE SOLE MANUFACTURES AND SUPPLIERS OF SUPA SHIELD. YOU DEAL DIRECTLY WITH US, FROM QUOTE TO ORDER TO FITTING/PROJECT COMPLETION.

Our showroom is located at
15 Meakin Road, Meadowbrook
